

song

REGGAE HEY HEY

Percussion Patterns

2. Music is generally written within some type of pattern.

When you are composing and arranging this pattern is called the **FORM** of the music.

Here are some different sections that can be in a song.

With your friends, decide which meanings match each section.

Introduction - the beginning of a song

Verse - a section of a song that tells part of its story

Chorus - the repeated part of a song

 **Coda** - the ending of a song

Listen to the song on the CD. Draw a triangle when you hear an introduction. Draw a square when you hear a verse. Draw a circle when you hear a chorus and draw a star when you hear an ending.

See if you had the same answers as your friends. This is a song in a verse and chorus form. It also has a beginning and an ending.

3. Write down the following three headings on a piece of paper. Try to present the headings using colours and styles of letters that you think might suit each of the styles of music.

CLASSICAL MUSIC

REGGAE MUSIC

TECHNO MUSIC

Discuss with your teacher what each music style might sound like. Some suggestions are given below. After your discussion, place each musical characteristic under the style of music that you think it might belong to.

* Clear and even rhythms *Laid back tempo/feeling *Can use guitars, drums, percussion

31B * Can be played by an orchestra *Disco dance rhythms *Can use electronic sounds
